FeatherWing Doubler – Prototyping Add–on For All Feather Boards
DESCRIPTION   −

This is the FeatherWing Doubler – a prototyping add−on and more for all Feather boards. This is similar to our FeatherWing Proto except there are two! The magic of the Doubler comes when stacking a Feather and another board on top of the Doubler so you can work with both boards simultaneously side−by−side! In addition to the board the Doubler comes with:

- 1 Doubler PCB
- 1 set Feather Stacking Headers
- 1 set Feather Female Headers

The Doubler, like the Proto, has a duplicate breakout for each pin on a Feather, as well as a bunch of plain grid proto holes. For GND and 3.3V, we give you a strip of connected pads.

You'll need to solder on the female headers or stacking headers however you like, the Doubler comes as a mini kit!

Technical Details

PCB Dimensions: 50.9mm x 47mm x 1.6mm / 2" x 1.85" x 0.06"
Weight: 6.7g
